

5 August 1982

NOTE FOR: Executive Director

FROM : EA/DDCI

Cheney,

You'll probably recall that when we went through the attached exercise, DDA was the only component that took it at least half seriously.

If done well, this is the kind of effort John believes Casey is looking for--evidence that we're taking a hard look at ongoing activities to identify potential savings at the same time we are pursuing our rebuilding efforts.

We're hoping this topic will not be on today's (5 August) Cabinet agenda. John would like you to work on this to have something available when the issue does come up.

Let me know if this should be in the EXCOM forum anywhere along the line.
